

# You Don't Need to Face Hereditary Cancer Alone.

Let FORCE support and empower you!

FORCE improves the lives of the millions of individuals and families facing hereditary breast, ovarian, pancreatic, prostate, colorectal and endometrial cancers. Our community includes people with a BRCA, ATM, PALB2, CHEK2, PTEN or other inherited gene mutation and those diagnosed with Lynch syndrome.

We provide up-to-date, expert-reviewed information and resources that help people make informed medical decisions. Our strong, supportive community of peers and professionals ensures no one must face hereditary cancer alone. FORCE serves as a champion, unifying the community and advocating for awareness, access to care and better treatment and prevention options.

## FORCE Resources and Support

### Information Library

Our website has one of the largest collections of expert-reviewed hereditary cancer information.

### Hereditary Cancer Research

FORCE's Search and Enroll Tool matches people who are affected by hereditary cancer with prevention, detection, treatment and other research studies that are enrolling people like them. FORCE's FRAT Program trains people who are new to science to use their personal experiences to help guide hereditary cancer research.

### Joining FORCEs Conference

The largest gathering of its kind, our conference attracts hereditary cancer survivors, individuals at high-risk for cancer, those with a strong family history of cancer, researchers and medical professionals. The next conference will be held virtually on September 29-30, 2021.

### Support

FORCE offers a peer navigation program to get matched for personalized support and to obtain a free resource guide, as well as online message boards, support meetings and a toll-free helpline (866) 288-7475 available in English or Spanish.

### XRAY: Behind the Cancer Headlines

The XRAY program helps people more easily understand hereditary cancer-related news, information and research that is covered by the media.
